# Welcome!

Welcome to Notre Dame Law School's Kresge Law Library! This library guide will inform you of the library's services, policies, and physical layout. If you have other questions, please ask the staff for assistance -- we are here to help you.

## About Notre Dame's Law Library

The Notre Dame Law Department was established in 1869. The first published mention of a law school library was not until twenty years later when the *Columbia Law Times* described the small collection of 2500 volumes as "spacious, well-lighted" and "well-ventilated."

In these early years, development of the law library's collection and staff was slow. The law school did not appoint the first law librarian, John Whitman, until 1925. His selection coincided with the law school's accreditation by the American Association of Law Schools. By 1930, after more than 60 years of existence, the library had only amassed a miserly total of 10,000 volumes. This modest collection did not require a large staff. In fact, in 1942, a single librarian, Lora Lashbrook, oversaw the entire operation -- and served concurrently as teacher of research methodology, law school registrar, and secretary to both the dean and the faculty!

Marie Lawrence succeeded to the post of librarian in 1945. She guided the collection for almost 25 years. At her retirement, the library stood at 69,000 volumes -- still quite small by American Bar Association standards.

The enlargement of the library's physical space in 1973 came under the leadership of the next librarian, Kathleen C. Farmann. The expansion and increased funding of the library, made possible in part by gifts from the Kresge Foundation, were welcomed but were nevertheless insufficient for the library's continued growth.

In 1985, the University committed itself to building a library that would support scholarship of the highest order, and it needed a librarian to spearhead that campaign. Roger Jacobs, then the Librarian of the U.S. Supreme Court, became the fifth Notre Dame law librarian.

The fruits of his efforts and the University's investment are apparent. In the past sixteen years the library staff, library seating, and library shelf space have more than doubled. Total library physical area has increased by a third. The number of available computer workstations is forty-nine. The law library collection, substantially augmented in 1990 by the acquisition of the Chicago Bar Association's library, now comprises 577,000 volumes. Conversion to the Library of Congress classification system is complete, and the collection is totally searchable through a web-based catalog.

The progress of the past will proceed in the future as we strive toward our goal of building a leading, national research facility.
